Job Title: UX/UI Designer

Job Description:
We are seeking a talented **UX/UI Designer** to join our team and craft intuitive, user-centered digital experiences. You will be responsible for designing engaging interfaces, enhancing usability, and ensuring a seamless user journey across web and mobile platforms.

Key Responsibilities:

- Conduct user research, create personas, and map user journeys

- Design wireframes, prototypes, and high-fidelity UI mockups

- Collaborate with product managers and developers to implement design solutions

- Ensure consistency with brand guidelines and accessibility standards

- Continuously test, iterate, and improve user experiences based on feedback and analytics

Requirements:

- Proven experience in UX and UI design

- Proficiency in design tools (e.g., Figma, Adobe XD, Sketch)

- Strong portfolio showcasing user-focused design solutions

- Understanding of responsive design and interaction principles

- Excellent communication and collaboration skills

Preferred:

- Knowledge of HTML/CSS

- Experience in design systems

Join us to help shape impactful digital experiences that users love.
